

Distributors Recruitment of JUNG PUMPEN

Company profile

- JUNG PUMPEN was established on 1st September, 1924 in Germany
- In early 1950s, Jung had already begun producing sewage lifting stations
- Jung products include small basement drainage pump, sewage treatment equipment, high-powered submersible sewage pump, tank system and control unit for urban sewage treatment, which together put up a blue sky of the Jung pump
- Based on the concept of "reliable wastewater treatment", Steinhagen's plants, European subsidiaries and global sales companies will do the best to meet your needs
- We are investing in the Chinese market through Pentair Shanghai (Jung Pump became part of Pentair in 2007)
- We already have a track record in China and excellent references, for instance, Hangzhou East Railway Station, CCTV Tower in Beijing etc.

Distributors Product Introductions

- Wcfix-Plus is an appropriate sewage lifting station for bathroom designed by European standard. It could perfectly solve the basic drainage of up to four drainage points in a single bathroom, including a shower, a toilet, a washbasin and a bidet. Wcfix-Plus has a wide range of applications, ranging from the same floor drainage to a depth up to sub-basement drainage
- Hebefix-Plus is a drainage pump for gray water, which mainly includes bathtubs, kitchen equipment, washing machines, etc. It is widely used in the same floor drainage and a depth up to sub-basement drainage
- Plancofix-Plus has designed for shower drainage, which makes barrier free bathroom's design possible. It is not only used in the drainage of basement shower and floor drain, but also applied to the shower drainage during the transformation of old buildings (first floor drain pump on the market offering barrier free showers, a booming trend in renovation)
